

My Child Doesn't Respond... Why?

A Parent's Guide to Understanding Your Child

You call their name again and again... but there is no response

Are You Experiencing This?

- ✓ My child doesn't respond when I call
- ✓ Sometimes it feels like they can't hear me
- ✓ They are engaged in their own world
- ✓ I repeat things many times but no reaction

You are not overthinking.
These signs matter.

Many parents go through this confusion – understanding the cause is the first step.

Is It a Hearing Problem or Something Else?

Hearing Issue Signs:

Doesn't respond to any sounds

Doesn't react to loud noises

Delayed reaction to all auditory input

Responds sometimes ignores other times

May hear but not process or respond

When Non-Response Could Be More Than Attention

- ✓ Not responding to name consistently
- ✓ Limited eye contact
- ✓ Doesn't follow simple instructions
- ✓ Prefers being alone
- ✓ Repetitive behaviors

Why Is My Child Not Responding?

- ✓ Difficulty processing language
- ✓ Reduced social engagement
- ✓ High screen exposure
- ✓ Developmental differences

*Every child is different –
guessing is not enough,
assessment is key*

Simple Ways to Improve Your Child's Response

- ✓ Call your child's name at eye level
- ✓ Use gestures along with words
- ✓ Keep instructions simple and clear
- ✓ Reduce screen time
- ✓ Reward responses with praise
- ✓ Play interactive games daily

Consistency at home makes a big difference

When Should You Seek Help?

- No response to name consistently
- Doesn't understand simple instructions
- No eye contact
- Delayed speech
- Parent intuition says something is wrong.

Take the First Step Today

If your child is not responding,
don't wait in confusion. Early
guidance can change your child's
development journey.
